EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harold H. Bennett II on December 17, 2007.

The application has been amended as follows:

In claim 21, line 3, "a sealing body" has been changed to --the second element--.

The title of the invention has been changed to --Device for maintaining a static seal of a high pressure pump.--

The drawing received on November 13, 2007 has been approved.

The following is an examiner's statement of reasons for allowance:

The claims are deemed allowable because the prior art does not teach or reasonably suggest a load chamber for a pump which remains pressurized independent of the operation of the pump, or a load chamber for a pump having a pressure source external to the pump and independent of pressure from the cylinder, configured to pressurize the load chamber to a selected operating pressure.

Regarding the Bauer reference, the check valve has a passage 14 which bleeds fluid from the load chamber 11 when the pump is not in operation, and therefore the pressure in the load chamber is not independent of operation of the pump.

Regarding the Vereschagin et al '427 reference, it is not clear what is the source of the oil under pressure which flows through duct 13 into the load chamber, if its pressure is independent of the operation of the pump, or if its pressure is selected.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
